F&N DIVISION

NEW INGREDIENT (2019)

Trade Name	Descriptions	Applications
STABILIZER		
Xanthan Gum	White powder	Used in sauces and dressing, meat and poultry products, bakery products, confectionery products, beverages, dairy products. It helps to prevent oil separation by stabilizing the emulsion, although it is not an emulsifier. It also helps to suspend solid particles such as spices. It helps create desire texture in many ice-creams.
PRESERVATIVE		
Sodium Benzoate	White powder	Food preservative commonly used in soft drinks, pickles, fruit juices and salad dressings.
ANTIOXIDANT		
Tocobiol		100% natural antioxidant contains tocopherols, sterols, squalene, monoglycerides and vegetable oil. Used in edible fats & oils, cereals, confectionery, snacks and nuts, sauces and seasoning, etc.
Nutrabiol		100% natural blend of tocopherols concentrate. Effective at low concentrations.
VITAMIN		
Vitamin E		100% natural Vitamin E. Higher bioavailability than synthetic Vitamin E. Available in ester forms: acetate and succinate.
